Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-21 and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jenekhe, 5,814,833, in view of Traynor, 4,629,798.

Jenekhe, 5,814,833, discloses in Fig. 8 an electronic device comprising:
electrodes 5 and 7;

a single layer of conductive polymer film 2 (see lines 17-19, column 49) including:
electron withdrawing group (see lines 22, column 2) from cyano, nitro groups
(see lines 51-52, column 7); aryl, phenyl, ethyl and biphenyl groups (see line 18
and 32-33, column 7); phosphine (see lines 25 and 53, column 53); binding
groups oxygen, sulfur atoms (see lines 33-34, column 5).

What is not shown in Jenekhe, 5,814,833, is the palladium electrode as recited in claim 21.

Traynor, 4,629,798, discloses the teaching of using palladium electrode in an electronic device having conductive polymer (see lines 42-43, column 12).

Art Unit: 2818

It would have been obvious under 35 USC 103(a) to one of ordinary skill in the art at the time of the invention was made to utilize the palladium electrode of Traynor, 4,629,798, for the electrodes 5 and 7 of Jenekhe, 5,814,833, for the purpose of design choice.

Conclusion

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Response to Arguments

4. Applicant's arguments filed on October 5, 2001 have been fully considered but they are not persuasive.

Jenekhe, 5,814,823, does clearly show in Fig. 8 and discloses in lines

Art Unit: 2818

17-19, column 49 that conductive polymer film 2 is a single layer. Accordingly, the rejection of claims 1-21 and 26 under 35 U.S.C. 103(a) as being unpatentable over Jenekhe, 5,814,833, in view of Traynor, 4,629,798, as set forth above is totally proper.
